

A doctor who is with you always — everyday.

What is Doctor On Demand?

No more waiting rooms, no more scheduling hassles. Doctor On Demand lets you see a doctor right away. All from your mobile device or computer.

Within minutes you'll be connected via video with a board-certified physician. They can diagnose, treat and even prescribe if necessary. Think of it like having your own personal doctor on call.

How does a video visit work?

The Doctor On Demand app works with any smartphone, tablet, or computer with a front-facing camera. You can download the app from the App Store, Google Play, or access care via DoctorOnDemand.com.

Through live video, our hand-picked doctors review symptoms and medications, perform an exam, and recommend a treatment plan. Our providers are available within minutes or by appointment. You can also schedule a visit with one of your favorite providers at any time that works for you.
